Electronic Data Reference Manual Mar 25 2022

Manual of Soil Laboratory Testing, Permeability, Shear Strength and Compressibility Tests May 03 2020 the second of three volumes that act as laboratory manuals for those involved in geotechnical laboratory testing. Volume 2 covers standard laboratory tests for the measurement of soil permeability, CBR value, shear strength (total stress and fully-drained), and condensation characteristics. This revised edition (1st ed., 1982) takes into account the changes and additions to BS 1377 in the 1990 revision of that Standard, and subsequent amendments. Some miscellaneous tests that are becoming increasingly significant have been added, as well as the ring shear test and an expanded treatment of consolidation tests on peat.
