Resource Dependence and Fiscal Effort in Sub-Saharan Africa Sep 30 2019 High natural resource prices in recent years have resulted in sizeable increases in fiscal revenue for many resource-exporting countries in sub-Saharan Africa. However, this revenue source is volatile, and arguably these countries should also rely on other forms of taxation to help fund public expenditure. This paper asks whether the availability of higher resource revenue in these countries has led to lower taxation effort of other revenue categories. The question is analyzed both in terms of the relationship between non-resource tax revenue and resource revenue, and between non-resource tax revenue and statutory tax rates. The paper finds evidence suggesting that nonresource revenue is negatively influenced by a higher resource revenue-to-GDP ratio. The lower take up of nonresource taxes in resource-rich countries is correlated with higher levels of corruption in these countries, suggesting weaker institutions affect nonresource revenue through incentives for tax evasion and/or large tax exemptions as argued in the literature.

Admissions to the College of St. John the Evangelist in the University of Cambridge ... Aug 10 2020 [The Burning Dark](#) Nov 05 2022 Adam Christopher's dazzling first novel, Empire State, was named the Best Book of 2012 by SciFi Now magazine. Now he explores new dimensions of time and space in The Burning Dark. Back in the day, Captain Abraham Idaho Cleveland had led the Fleet into battle against an implacable machine intelligence capable of devouring entire worlds. After saving a planet, and getting a bum robot knee in the process, he finds himself relegated to one of the most remote backwaters in Fleetspace, overseeing the decommissioning of a semi-deserted space station. The station's reclusive commandant is nowhere to be seen. Persistent malfunctions plague the station's systems while interference from a toxic purple star makes even ordinary communications problematic. Alien shadows and whispers seem to haunt the lonely corridors and airlocks, fraying the nerves of everyone aboard. Isolated and friendless, Cleveland reaches out to the universe via an old-fashioned space radio, only to tune in to a strange, enigmatic signal: a woman's voice that echoes across a thousand light-years of space. But is the transmission just a random bit of static from the past--or a warning of an undying menace beyond mortal comprehension?

Monetary Transmission Mechanism in the East African Community Feb 25 2022 Do changes in monetary policy affect inflation and output in the East African Community (EAC)? We find that (i) Monetary Transmission Mechanism (MTM) tends to be generally weak when using standard statistical inferences, but somewhat strong when using non-standard inference methods; (ii) when MTM is present, the precise transmission channels and their importance differ across countries; and (iii) reserve money and the policy rate, two frequently used instruments of monetary policy, sometimes move in directions that exert offsetting expansionary and contractionary effects on inflation—posing challenges to harmonization of monetary policies across the EAC and transition to a future East African Monetary Union. The paper offers some suggestions for strengthening the MTM in the EAC.

Songs for "great Leaders" Apr 05 2020 "North Korea is often said to be unknown: a reclusive and secretive state. It behaves as if the whole country is a theatre that projects itself through performance. Song, together with other music and dance production, forms the soundtrack to the theater of daily life, embedding messages that tell the official history, the exploits of leaders, and the socialist utopia yet-to-come. Songs form the foundation stones of revolutionary operas, of instrumental and orchestral tone poems, and are rearranged in countless versions for use by children in kindergartens, for 50,000 young people who dance annually in celebration of the Eternal President's birthday, and for the 100,000 participants of mass spectacles such as the Arirang Festival. North Koreans are reminded daily on state-controlled television news how their songs are beamed around the world by satellite, and songs are today routinely uploaded to YouTube and Youku. This is the first book-length account of North Korean music and dance in any language other than Korean. It is based on fieldwork, on interviews, and resources researched in private and public archives and libraries in North Korea, but also in South Korea, China, North America and Europe. It explores revolutionary songs written in the 1940s and pop songs from the 2010s, exploring in a critical but informed way not just songs, but also developments of Korean instruments, the creation of revolutionary operas that embed the state's ideology of *juche* "self-reliance", mass spectacles, dance and dance notation, and composers and compositions"--

Business Criminal Law Aug 29 2019 This textbook deals with business criminal law from the perspective of Germany, Austria, Liechtenstein and Switzerland. It primarily addresses students in business and economics (master's programme) as well as business practitioners, but is also meant for lawyers and law students. As criminal law legislators exert considerable influence on economic life, raising and growing awareness in the area of criminal law seems compulsory for future managers and executives. This textbook approaches the legal field less normatively and rather in a practical and entrepreneurial way. Its contents are based on the master level class "Business Criminal Law" at "MCI / The Entrepreneurial School" taught by the author.

The Shield, Vol. 1 Oct 04 2022 Over the centuries, in our nation's times of need, a supernatural force appears to battle back the enemies of the United States: THE SHIELD. A modern action and conspiracy thriller by bestselling novelists Adam Christopher and Chuck Wendig featuring the dynamic artwork of David Williams, THE SHIELD: DAUGHTER OF THE REVOLUTION gives readers a topical, relevant and jarring new take on the classic hero. Taylor Visits Africa Jan 03 2020 Many low-income countries do not use interest rates as their main monetary policy instrument. In East Africa, for instance, targeting money aggregates has been pretty much the rule rather than the exception. Nevertheless, these targets are seldom met and often readjusted according to the economic environment. This opens up the possibility that central banks are de facto pursuing a strategy more akin to a Taylor Rule. Estimations of small-scale models for Kenya, Uganda and Tanzania suggest that these self-styled "monetary targeters" are respecting the Taylor Principle, that is are on average increasing nominal interest rates more than proportionally to inflation. Nevertheless, steep deviations from the Taylor Rule have taken place in Kenya and Tanzania. In Uganda, these errors are much smaller, in fact similar in size to Taylor Rule deviations found for Brazil. More surprisingly, they are smaller than South Africa's, the continent's sole long-term inflation targeter.
