Ordinary Cities, Extraordinary Geographies Mar 21 2022 This insightful book explores smaller towns and cities, places in which the majority of people live, highlighting that these more ordinary places have extraordinary geographies. It focuses on the development of an alternative approach to urban studies and theory that foregrounds smaller cities and towns rather than much larger cities and conurbations.

Australian Falcons Aug 22 2019 Falcons are stunning and iconic birds. Australia has six falcon species, with two endemic to the continent and two others endemic to the Australasian region. They are important indicators of the health of our ecosystems, due to their position at the top of the food chain. But several species are declining, with two species threatened in some states. In *Australian Falcons: Ecology, Behaviour and Conservation*, Dr Stephen Debus provides a 30-year update of knowledge on these six species, as well as a falcon-like hawk, the Black-shouldered Kite. This book is based partly on the author's field studies, as well as being a supplement to the *Handbook of Australian, New Zealand and Antarctic Birds (HANZAB)* and recent global treatises. It offers up-to-date information on the Australian species, including their behaviours, ecology and biology. It reviews their population status and threats, and suggests what needs to be done to ensure the future of these spectacular birds. *Australian Falcons* is an invaluable resource for raptor biologists,

Pasicrisie Internationale 1794-1900 Aug 26 2022 When the United Nations undertook the publication of the Reports of International Arbitral Awards, the 'Pasicrisie internationale' was identified as one of the rare truly general collections of international case law in existence. In fact, in deciding to publish the arbitration clauses and arbitral awards from 1794 to 1900, Henri La Fontaine was doing pioneering work, foreshadowing the famous Reports by half a century. As we near the end of the century, the 'Pasicrisie internationale'

remains just as pertinent as it was when first published in 1902. This collection of arbitral awards, with its modest appearance, has certainly contributed more to the development of international arbitration case law than any number of lyrical speeches advocating peace through law. First edition printed in 1902 by Stämpfli, Bern. Lorsque l'Organisation des Nations Unies entreprit la publication de son Recueil des sentences arbitrales, elle identifia la Pasicrisie internationale comme constituant l'une des rares véritables collections générales de jurisprudence internationale préexistantes. De fait, en décidant de rassembler les clauses compromissaires et les sentences arbitrales de 1794 à 1900, Henri La Fontaine avait fait oeuvre de pionnier et il préfigurait, avec un demi-siècle d'avance, le célèbre Recueil. En cette fin de siècle, la Pasicrisie internationale constitue donc un outil de travail toujours aussi actuel que lors de sa publication en 1902. Cette

compilation de sentences arbitrales, d'apparence modeste, a certainement plus contribué au développement de la jurisprudence arbitrale internationale que bien des discours lyriques prônant la paix par le droit. Première édition imprimée en 1902 par Stämpfli, Berne.
