researchED Guide to Leadership Dec 29 2019 researchED is an educator-led organisation with the goal of bridging the gap between research and practice. This accessible and punchy series, overseen by founder Tom Bennett, tackles the most important topics in education, with a range of experienced contributors exploring the latest evidence and research and how it can apply in a variety of classroom settings. Claiming that the leadership industry has failed to have the impact on schools that is required, this book takes a fresh view that domain-specific knowledge and expertise is vital to running schools well and argues that we tend to underestimate the knowledge required to do this complex job efficiently. In the researchED guide to leadership, Stuart Lock brings together chapters by experts including Dylan William, Jen Barker, Danielle Dennis, Jon Hutchinson and The Reading Ape to unpick the challenges of school leadership, combining a thorough trawl of the research and mixing in practical advice to exemplify a very different approach to leading schools - one that is rooted in developing the required knowledge to address the challenges that are common to our schools.

The Art of Solution Focused Therapy Aug 17 2021 What is Solution-Focused Therapy? Solution Focused Therapy (SFT) is a unique, goal-directed therapy aimed at helping clients regain autonomy by determining and achieving their own goals. Solution focused therapists encourage clients to focus on solutions, not problems, and help clients effectively plan how to reach their goals. Unlike other therapies, SFT holds an abiding belief in clients' abilities to know what is best for them, rather than have a therapist tell them. Why this book? This book not only provides an overview of the Solution Focused therapy model, its basic tenets, and theories; it also presents intimate interviews with expert practitioners-all of whom use SFT in their own practice. To this end, the book offers a wealth of insight into the theory and practice of SFT, to help practitioners decide whether SFT is right for them and their clients. These experts offer details of their apprehensions, goals, breakthroughs, and overall experiences with the therapy. The team of expert contributors includes Eve Lipchik, Yvonne Dolan, Alasdair Macdonald, Thorana Nelson, and many more. Questions the experts address include: How did you discover that SFT was the model that fit your clients' needs? What characteristics of this model drew you towards it? How has SFT impacted your personal life? What is it about SFT that makes it so effective? What are your favorite cases and how did they affect your work as a therapist?

Intermediate Algebra: An Applied Approach Mar 31 2020 As in previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://goengage.com/infotrac>.
