[Pierre Teilhard de Chardin](#) Jun 19 2021 The Phenomenon of Man, The Divine Milieu and The Hymn of the Universe, led to a huge interest in his thinking that affected and moved theologians and ordinary Catholics for a generation in the middle of the last century. Many of his ideas on the nature of evolution and the problems of original sin continue to influence contemporary Christian theology. While his influence and popularity may have waned somewhat in recent years, this timely new biography from a fellow Jesuit theologian and philosopher brings fresh light to the life, work, achievements and legacy of a theologian and scientist whose contribution to our understanding and insights into the human condition continues to inform, excite and encourage.

*The Legacy of Pierre Teilhard de Chardin* Dec 14 2020 This collection of essays is a testimony to the spiritual, theological, and scientific legacy of Pierre Teilhard de Chardin. The contributors, both scientists and theologians, are all well-known scholars who have made significant contributions through their research. In their essays, they share their own insights about the nature and continuing influence of Teilhard's writings. The book provides reflections by acknowledged authorities on Teilhard's spiritual life, on the friends with whom he corresponded, on his spiritual and philosophical theological orientations, and on the continuing significance of his scientific interests. James Salmon, SJ, is a professor in the chemistry and theology departments at Loyola University Maryland and Senior Fellow at the Woodstock Theological Center at Georgetown University. He founded the Annual Cosmos and Creation Conference in 1982 and codirects the conference at Loyola University Maryland. John Farina is a professor of religious studies at George Mason University. The former editor-in-chief of the Paulist Press Classics of Western Spirituality and Sources of American Spirituality series, he is the author of numerous books

**Pierre Teilhard de Chardin on People and Planet** Jun 27 2019 Humanity's relationship to nature is central to the work of Pierre Teilhard de Chardin, an influential priest and scientist of the twentieth century. Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity's understanding of its place in the world. 'Pierre Teilhard de Chardin on People and Planet' argues that Teilhard's cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality. The book offers a critical revision of Teilhard's thought in the light of current debates in evolutionary science, eco-theology and environmental ethics. The essays present fresh interpretations of Teilhard's work and point to the significance of his thought in the contemporary study of science and religion.

**Teilhard de Chardin** Jan 03 2020 Illuminating Teilhard's thought with excerpts from his unpublished notes and correspondence, the author relates Teilhard's ideas to his spiritual life, tracing the origin of his thought and its development. This spiritual journey describes Teilhard's early years and family background; his training as a Jesuit; the preparation of his scientific career; and his attainment of intellectual maturity during World War I.

*Christianity and Evolution* Mar 29 2022 Nineteen essays concerned with the relationship of science and religion. As a believing scientist, Teilhard wrestled with the problem of presenting to the believer a scientific picture that would enlarge his religious vision and to the scientist a statement of religious ideas that would integrate with his understanding of reality. Foreword by N. M. Wildiers; Index. Translated by Ren• Hague. A Helen and Kurt Wolff Book

[The Divine Milieu](#) Apr 29 2022 The essential companion to Pierre Teilhard de Chardin's *The Phenomenon of Man*, *The Divine Milieu* expands on the spiritual message so basic to his thought. He shows how man's spiritual life can become a participation in the destiny of the universe. Teilhard de Chardin -- geologist, priest, and major voice in twentieth-century Christianity -- probes the ultimate meaning of all physical exploration and the fruit of his own inner life. *The Divine Milieu* is a spiritual treasure for every religion bookshelf.

**Human Energy** Aug 22 2021 "A Helen and Kurt Wolff book." Translation of L'Énergie humaine.

**The Future of Man** Nov 05 2022 Cover the wide-ranging interests and inquiries that engaged Teilhard de Chardin throughout his life: intellectual and social evolution, the coming of ultra-humanity, the integral place of faith in God in the advancement of science, and the impact of scientific discoveries on traditional religious dogma. Less formal than *The Phenomenon of Man* and *The Divine Milieu*, Teilhard de Chardin's most renowned works, *The Future of Man* offers a complete, fully accessible look at the genesis of ideas.

**Pierre Teilhard de Chardin und Jean-Paul Sartre. Zwei Philosophen in der Tradition des Humanismus?** Sep 10 2020 Studienarbeit aus dem Jahr 2006 im Fachbereich Theologie - Systematische Theologie, Note: 1,0, Universität Bremen (FB Religionswissenschaft), Veranstaltung: Seminar: Ist Gott tot? Kritische Theorie der Religion, Sprache: Deutsch, Abstract: "L'existentialisme est un humanisme" postuliert der französische Philosoph Jean Paul Sartre programmatisch im Titel seines 1945 verfassten Essays, der in engem Zusammenhang mit seinem 1943 publizierten Hauptwerk "L'Être et le néant" steht, dessen Hauptthesen der Essay popularisieren und gegen Einwände unterschiedlichster Gegner verteidigen soll. Ebenfalls in der Tradition des Humanismus sieht sich ein völlig andere Ideen entwickelnder französischer Philosoph, Naturforscher und Theologe, der Jesuitenpater Pierre Teilhard de Chardin, der in seinem etwa zeitgleich mit Sartres Essay entstandenen Hauptwerk "Le phénomène humaine" nicht von einem philosophischen Ansatzpunkt ausgeht wie Sartre, sondern von einem naturwissenschaftlichen. Unter schrittweiser Darstellung der Evolution des Universums geht Teilhard der Frage nach, wie die Menschheit entstanden sei und welchem Ziel sie zustrebe. Als Priester geht er schließlich noch einen Schritt weiter und versucht, "eine radikale Vergegenwärtigung der christlichen Botschaft, d.h. für ihn (...) ihre Übersetzung in das Weltbild der Evolution". Fragt man sich nach grundlegenden Gemeinsamkeiten in diesen auf den ersten Blick doch sehr unterschiedlichen anthropologischen Entwürfen, so fällt vor allem die zentrale Rolle auf, die dem Humanen in beiden Weltanschauungen zugewiesen wird. Hierin liegt wohl der Grund dafür, dass sowohl Sartre als auch Teilhard ihre Weltanschauungen als Humanismus bezeichnet haben. Für eine präzise Verwendung des Begriffs im Rahmen dieser Arbeit muss zunächst einmal die Anthropologie Teilhards und Sartres in ihren wesentlichen Grundzügen dargestellt werden, wobei Gemeinsamkeiten und Unterschiede herausgearbeitet werden müssen. Im Anschluss daran soll das ihnen zugrunde

**On Love & Happiness** Feb 25 2022 Essays examine the power of love, the path to true happiness, and the nature of marriage

**Activation of Energy** Oct 12 2020 An important Christian philosopher contends that if human energy is channeled in the right direction, "upward and outward," spiritual energy as a motor force in the universe will outdistance technological advance. Index. Translated by Rene Hague. A Helen and Kurt Wolff Book

**Building the Earth** Apr 17 2021 Political, moral and religious ideas about the future of man.

**Evolution of Consciousness** Mar 17 2021 From the alpha to the omega, Pierre Teilhard de Chardin offers an evolution-of-consciousness paradigm of the universe and a triumphant vision of humankind and its future. Guided by a creative process that motivated Teilhard, Vincent Frank Bedogne aims to unite matter with consciousness, science with spirituality. He looks beyond Darwin and the big bang; beyond traditional ideas of God, religion, and the human role in existence. As he does, we realize that the universe is crossing the most profound threshold in its evolution since the dawn of reflective thought a thousand lifetimes ago; and, like the threshold to reflection, this blossom of transcendence is unfolding within us. The book philosopher Pierre Teilhard de Chardin would have written had he lived another fifty years.

Einblicke ins Universum von Pierre Teilhard de Chardin Dec 26 2021 Das Buch beginnt mit einem Gebet von Teilhard, das er mit 35 Jahren verfasst hat, und das bereits den Kern seiner Vision enthält (Kapitel 1). Die Essenz von Teilhards Entwicklungslehre ist in Thesenform in Kapitel 2 zu finden. In Kapitel 3 wird ein moderner christlicher Einweihungsweg skizziert, der auf Teilhards Spiritualität basiert. Kapitel 4 besteht aus Beispielen, wie Teilhard die Begriffe Transformation und Transfiguration verwendet. Kapitel 5 beschreibt Darwins Gottesbild und wie sich dieses im Lauf der Zeit verändert hat. In Kapitel 6 wird eine neuartige Entwicklungstheologie vorgeschlagen. Kapitel 7 erklärt, was Paradigmen und Paradigmenwechsel sind und was sie für die Spiritualität unserer Zeit bedeuten. Kapitel 8 zeigt, weshalb Rituale wirken und wie Gewohnheit und Kreativität in Ritualen zusammenspielen. In Kapitel 9 findet man eine Anwendung des Teilhard'schen Bewusstseinsbegriffs in der neuen Physik. Kapitel 10 beschreibt, wie zwei Naturwissenschaftler zu tiefen Einsichten über kosmische Zusammenhänge und zum Verhältnis von Geist und Materie gelangten. Kapitel 11 enthält einige kritische Bemerkungen zu unvorsichtigen Annäherungsversuchen von Wissenschaft und Spiritualität. Den Abschluss bildet Kapitel 12 mit einer poetischen Hommage an Teilhard.

Understanding Pierre Teilhard de Chardin Jul 01 2022

**Pierre Teilhard de Chardin and Carl Gustav Jung: Side by Side** Oct 24 2021 Pierre Teilhard de Chardin and C.G. Jung: Side by Side is an anthology written by authors from different backgrounds, sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and/or how they understand the relevance of these two men for our present times. Contributors to this fourth volume of the Fisher King Review include: John Dourley, Peter Dunlap, Barbara Faris, Fred R. Gustafson, John Giannini, Richard W. Hanhardt, Robert Henderson, Steven B. Herrmann, Jane A. Kelley, Jon Magnuson, Francisco B. Martorell, Stan V. McDaniel, Dennis L. Merritt, and Laura A. Weber. Though C.G.Jung and Pierre Teilhard de Chardin never met, their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the foreground of needing to understand and integrate on a planetary level the core values of their expansive work. Both Jung and de Chardin were concerned with science and religion and operated within these paradigms. Both of them shook the world by offering up views, on one hand, of the profound depths of the human psyche and, on the other, presenting a profound re-consideration of evolution as a process leading toward a social unification of the planet. One used the concept of individuation, the other spoke of evolution. Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them. Both had conflicts in their chosen fields. Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology, world religions, folk tales, dreams, and human behavior. Chardin used the ground of religion to work in the field of science via paleontology, geology, and physics as he explored a deeper and relevant understanding of evolution. Though each began from different intellectual platforms, they each crisscrossed into the other's territory of inquiry and related their ideas to include the full scope of humanity. One went deeply into soul and found matter, whereas, the other went deeply into matter and found soul. In their own ways both spent their careers trying to heal the split between spirit and matter in the weltanschauung of their times reflected in the human psyche and in the general religious views permeating most of Western culture.

The Phenomenon of Man Oct 04 2022 Visionary theologian and evolutionary theorist Pierre Teilhard de Chardin applied his whole life, his tremendous intellect, and his great spiritual faith to building a philosophy that would reconcile religion with the scientific theory of evolution. In this timeless book, which contains the quintessence of his thought, Teilhard argues that just as living organisms sprung from inorganic matter and evolved into ever more complex thinking beings, humans are evolving toward an "omega point"—defined by Teilhard as a convergence with the Divine.

**Teilhard de Chardin and Eastern Religions** Oct 31 2019 Teilhard de Chardin and Eastern Religions is, in part, an update of the 1980 classic, *Toward a New Mysticism*. Author Ursula King has extensively revised this work, adding new material as she traces Teilhard's encounter with Eastern thought. It includes an extensive bibliography and annotated study guide. Book jacket.

**Sammlung** Dec 02 2019 In 1929, the noted French paleontologist and Jesuit priest Pierre Teilhard de Chardin met Lucile Swan, an American sculptor at a dinner party in Peking. This first evening together began a remarkable friendship that lasted for twenty-five years and was recorded in their correspondence. This volume tells their story in their own words.

**The Heart of Matter** May 31 2022 Pierre Teilhard de Chardin SJ. 1 May 1881 – 10 April 1955 was a French philosopher and Jesuit priest who trained as a paleontologist and geologist and took part in the discovery of Peking Man. Between Science and Religion Aug 10 2020 In examining this period, the author applies Ian Barbour's categories for the relationship of religion and science: conflict, independence, dialogue, and integration, focusing primarily of the dialogue, conflict and integration categories. --pref.

Toward the Future Nov 24 2021 "A Helen and Kurt Wolff book." Translation of *Les directions de l'avenir*. Includes bibliographical references and index.

Teilhard de Chardin May 07 2020 Eine Synthese von Evolutionstheorie und christlichem Glauben erscheint nach den Ergebnissen der Kosmologie und der Biologie heute weniger problematisch, als sie es noch vor mehreren

Generationen war. Im 50. Todesjahr des großen französischen Paläontologen und Theologen Pierre Teilhard de Chardin informiert dieser Band aus interdisziplinärer Sicht über die aktuelle Diskussion der von ihm vorgelegten großen Synthese. Die verschiedenen Beiträge stellen Teilhard aus biologisch-paläontologischer Perspektive dar und beschreiben die Auseinandersetzungen der katholischen und evangelischen Theologie mit Teilhard. Zudem wird das Thema "Christus als Weltseele" behandelt. Den Band beschließt eine Darstellung aus der Sicht neuerer physikalischer Kosmologie.

**Spirit of Fire** Nov 12 2020 Spirit of Fire is the critically acclaimed biography of one of this century's most fascinating religious figures. Pierre Teilhard de Chardin (1881-1955) was a Jesuit theologian and a scientist renowned for his pioneering field work in geology, paleontology, and human origins. He was also a mystic whose writings have inspired an international host of Teilhard societies, and a prophet in the expanding dialogue between religion and science. Spirit of Fire is lavishly illustrated with photographs and selections from Teilhard's writings. It is the ideal introduction to the life and thought of this modern Catholic mystic whose powerful vision and life-affirming spirituality speak even more vitally to the concerns of our time. **Der Mensch im Kosmos** Aug 02 2022 «Meines Erachtens gibt es für das denkende Wesen keinen entscheidenderen Augenblick als den, wo ihm gleichsam die Schuppen von den Augen fallen und es entdeckt, dass es nicht einsam in den Einöden des Weltalls verloren ist, sondern dass ein universeller Lebenswille in ihm zusammenströmt und sich in ihm vermenschlicht. Der Mensch ist nicht, wie er so lange geglaubt hat, fester Weltmittelpunkt, sondern Achse und Spitze der Entwicklung – und das ist viel schöner.» Pierre Teilhard de Chardin Pierre Teilhard de Chardin beschreibt in seinem Hauptwerk «Der Mensch im Kosmos» die Geschichte der Welt von der Entstehung der Materie über die Evolution der Lebensformen bis zur Entwicklung des Menschen, in dem sich Materie und Geist verbinden und die Materie sich erstmals ihrer selbst bewusst wird. Am Ende steht die Vision von einer immer weiter fortschreitenden Evolution, in der die Menschheit ein Kollektivbewusstsein ausbildet. Das weltberühmte Buch ist eine der letzten großen ganzheitlichen Darstellungen der Natur- und Geistesgeschichte und zugleich ein faszinierender Vorläufer heutiger Big-History-Erzählungen.

**Die Zukunft des Menschen** Sep 03 2022

**Human Phenomenon** Sep 30 2019 In this work, Teilhard guides the reader back in space-time to experience the birth of our planet as it imprisons the human future in its globe and motion, then forward, through the emergence of life and the birth of thought and socialization.
