Caricature Supervision in the Hospitality Industry The Cunning of Uncertainty **Being and Becoming European in Poland** Primates in Flooded Habitats **Bankruptcy Code**

The Rise of Victorian Caricature Nov 24 2019 This book serves as a retrieval and reevaluation of a rich haul of comic caricatures from the turbulent years between the Reform Bill crisis of the early 1830s and the rise and fall of Chartism in the 1840s. With a telling selection of illustrations, this book deploys the techniques of close reading and political contextualization to demonstrate the aesthetic and ideological clout of a neglected tranche of satirical prints and periodicals dismissed as ineffectual by historians or distasteful by contemporaries. The prime exhibits are the work of Robert Seymour and C.J. Grant giving acerbic comic edge to the case for reform against class and state oppression and the excesses of the monarchical regime under the young Queen Victoria.

Managing Organizations for Sustainable Development in Emerging Countries Nov 17 2021 Managing Organizations for Sustainable Development in Emerging Countries focuses on the main challenges and opportunities of managing firms and emerging economies in the light of sustainable development. One of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering, simultaneously, environmental issues like conservation of natural resources, eco-efficiency, biodiversity conservation, and climate-change mitigation. These questions are relevant for government, industry, and urban sustainability. However, in the modern literature that discusses organizational management for sustainable development, few studies focus on the reality of organizations from emerging countries. Moreover, changing environmental legislation in emerging countries (such as China and Brazil) will affect

organizational managers. In this context, this book may contribute to organizational management in the search for more sustainable organizations, as well as deal with the challenges of managing organizations in the context of increased social problems, degradation of natural resources, loss of biodiversity, and climate change. This book was published as a special issue of the International Journal of Sustainable Development & World Ecology.

Post-colonial struggles for a democratic Southern Africa

Mar 09 2021 National liberation, one of the grand narratives of the twentieth century, has left a weighty legacy of unfulfilled dreams. This book explores the ongoing struggle for legitimate, accountable political leaders in postcolonial Southern Africa, focussing on dilemmas arising when ex-liberation movements form the governments. While the spread of multi-party democracy to most countries in the region is to be celebrated, democratic practice often has been superficial - a limited, elitist politics that relies on the symbols of the liberation struggle to legitimate de facto one-party rule and authoritarian practices. Using country cases from Tanzania, Swaziland, Zimbabwe, South Africa and Zambia, the collection explores three subthemes relevant to postcolonial governance in Southern Africa: how the struggle for liberation shapes the character of political transformation, the nature of rule in one-party dominant states headed by former liberation movements, and the processes of governance and resistance in post-liberation contexts. This book was published as a special issue of the Journal of Contemporary African Studies.

Being and Becoming European in Poland Aug 22 2019

Overthrowing communism in 1989 and joining the European Union in 2004, the Polish people hold loyalties to region, country and now continent - even as the definition of what it means to be 'European' remains unclear. Paying particular attention to those who came of age in the earliest years of the neoliberal and democratic transformations, this book uses the life-story

narratives of rural and urban southern Poles to reveal how 'being European' is considered a fundamental component of 'being Polish' while participants are simultaneously 'becoming European'. Ultimately, this study demonstrates how the EU is regarded as both an idea and an instrument, and how ordinary citizens make choices that influence the shape of European identity and the legitimacy of its institutions.

Contemporary Challenges for Religious and Spiritual

Education Feb 26 2020 From being on the margins of scholarly debate for much of the past century and a half, religion is being recognized once again as an area of concern for scholars, politicians, and public policy makers, and thus, the role of religious and spiritual education has taken on a new importance. Apart from its socio-political ramifications, the place of religiousness and spirituality in the make-up of individuals has been given renewed prominence through updated brain science, and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness. This book explores many of the new directions being taken in the field of religious and spiritual education, as new developments challenge the priorities of formal education, and open up new avenues for incorporating religion and spirituality into the modern curriculum. It asks whether the educational aims of teachers should be focused on specifically personal development, or whether religious education should be used to develop understanding of more global and social issues such as citizenship, conflict, and ethics. The book also addresses neuroscientific insights, which suggest a need to engage with cognition and emotion in order to create a rich learning environment, something to which a particularly contested subject area like religion and spirituality is well-placed to contribute. This book was originally published as a special issue of the Journal of Beliefs & Values.

Bisexuality in Education Mar 29 2020 Although many schools and educational systems, from elementary to tertiary level, state that they endorse anti-homophobic policies, pedagogies and programs, there appears to be an absence of education

and affirmation of, bisexuality and minimal specific attention paid to bi-phobia. Bisexuality appears to be falling into the gap between the binary of heterosexuality and homosexuality that informs anti-homophobic policies, programs, and practices in schools initiatives such as health education, sexuality education, and student welfare. These erasures and exclusions leave bisexual students, family members and educators feeling silenced and invisibilized within school communities. Also absent is attention to intersectionality, or how indigeneity, gender, class, ethnicity, rurality and age interweave with bisexuality. Indeed, as much research has shown, erasure, exclusion, and the absence of intersectionality have been considered major factors in bisexual young people, family members and educators in school communities experiencing worse mental, emotional, sexual and social health than their homosexual or heterosexual counterparts. This book is the first of its kind, providing an international collection of empirical research, theory and critical analysis of existing educational resources relating to bisexuality in education. Each chapter addresses three significant issues in relation to bisexuality and schooling: erasure, exclusion, and the absence of intersectionality. From indigenous to rural schools, from tertiary campuses to elementary schools, from films to picture books as curriculum resources, from educational theory to the health and wellbeing of bisexual students, this book's contributors share their experiences, expertise and ongoing questions. This book was originally published as a special issue of the Journal of Bisexuality.

English Pronunciation for Speakers of Spanish Jan 19 2022
English Pronunciation for Speakers of Spanish fills a gaping hole in the market for books on English phonetics and pronunciation because it not only combines theoretical issues and applications to practice, but it also adopts a contrastive English-Spanish approach to better suit the needs of Spanish-speaking learners of English (SSLE), enabling them to build gradually on the

knowledge gained in each chapter. The book covers the key concepts of English phonetics and phonology in seven chapters written in an accessible and engaging style: 1. Phonetics and Phonology 2. The Production and Classification of Speech Sounds 3. Vowels and Glides 4. Consonants 5. Segment Dynamics: Aspects of Connected Speech 6. Beyond the Segment: Stress and Intonation 7. Predicting Pronunciation from Spelling (and vice versa) Features: in-text audio illustrations, as well as over a hundred written and audio exercises with corresponding keys and different kinds of artwork (Tables, Figures, illustrations, spectrograms, etc.) classic readings in the discipline in the Further Reading section of each chapter highlights the phonetic contrasts and specific cues that are more important to aid comprehension in English and offers guidelines on "correct" pronunciation habits to help SSLE sound as close as possible to native English The book's companion website, EPSS Multimedia Lab, can be used on computers, smartphones and tablets, and is useful for the self-taught student and the busy lecturer alike. Features of the website: a complete sound bank defining and illustrating the sounds of English RP as compared with those of Peninsular Spanish written definitions and animated diagrams, videos and original recordings (by native speakers of English and Spanish) showing the articulation of each sound, alongside its most common spellings, as well as pronunciation practice for individual words and whole sentences a comprehensive selection of over a hundred written and audio exercises (with their keys) for practice both at home or in the language lab audio files corresponding to the audio illustrations given in the written book a repository of useful resources by topics and a list of online glossaries and pronunciation dictionaries

The Cunning of Uncertainty Sep 22 2019 Uncertainty is interwoven into human existence. It is a powerful incentive in the search for knowledge and an inherent component of scientific research. We have developed many ways of coping with

uncertainty. We make promises, manage risks and make predictions to try to clear the mists and predict ahead. But the future is inherently uncertain - and the mist that shrouds our path an inherent part of our journey. The burning question is whether our societies can face up to uncertainty, learn to embrace it and whether we can open up to a constantly evolving future. In this new book, Helga Nowotny shows how research can thrive at the cusp of uncertainty. Science, she argues, can eventually transform uncertainty into certainty, but into certainty which remains always provisional. Uncertainty is never completely static. It is constantly evolving. It encompasses geological time scales and, at the level of human experience, split-second changes as cells divide. Life and death decisions are taken in the blink of the eye, while human interactions with the natural environment may reveal their impact over millennia. Uncertainty is cunning. It appears at unexpected moments, it shuns the straight line, takes the oblique route and sometimes the unexpected short-cut. As we acknowledge the cunning of uncertainty, its threats retreat. We accept that any scientific inquiry must produce results that are provisional and uncertain. This message is vital for politicians and policy-makers: do not be tempted by small, short-term, controllable gains to the exclusion of uncertain, high-gain opportunities. Wide-ranging in its use of examples and enriched by the author's experience as President of the European Research Council, one of the world's leading funding organisations for fundamental research. *The Cunning of Uncertainty* is a must-read for students and scholars of all disciplines, politicians, policy-makers and anyone concerned with the fundamental role of knowledge and science in our societies today.

The Lifework and Legacy of Iona and Peter Opie May 31 2020 Iona and Peter Opie were twentieth-century pioneers. Their research and writing focused on the folklore of British children - their games, rhymes, riddles, secret languages and every variety of the traditions and inventions of the children's collective physical and verbal play. Such closely observed, respectful, good-humoured and historically attuned writing about the traditions of childhood was a revelation to English-language readers around the world. Their numerous books were a rare phenomenon: they attracted a popular readership far beyond the professional and academic communities. For those who work with children, their collaborative research was a powerful influence in confirming the immense capacities of the young for cooperation, conservation, invention and imagination. Their books challenged - then and now - the bleak and limited view of children which focuses on their smallness, ignorance and powerlessness. The writers in this volume pay their tribute to the Opies by exploring a world of

varied topography of children's play, from different countries and different perspectives. Their research is vivid and challenging; that is, as it should be, in the tradition of the Opies. This book was originally published as a special issue of the International Journal of Play.

Revisiting Integrated Water Resources Management Sep 03 2020

The book includes seventeen excellent researched and documented papers that reflect the diversity of thought, ideas and experiences related to IWRM. They draw from an extensive, inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local, basin, regional and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal, policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation and the reasons why that has been the case; reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery; and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the International Journal of Water Resources Development.

A Message From the Other Side Nov 05 2020 When Catherine moves several hundred miles away from her sister, Helen says, 'Phone calls aren't enough', but they make it easier to edit the truth. Helen can dismiss Gilbert and his enchanted Factory as 'weird' when she's never met him, and Catherine think Helen foolish for loving the unreliable and dangerous Joe. Neither sees the perils concealed in what they have not told each other, or guesses at the sinister connection between their separate lives. A Message from the Other Side is a novel about love and marriage, but even more about hatred and the damage people do to each other in the most ordinary of families.

Underdogs Jan 07 2021 An insider's view of China's under-the-radar, globally competitive innovators. Chinese innovators are making their mark globally. Not only do such giants as Alibaba and Huawei continue to thrive and grow through innovation, thousands of younger Chinese entrepreneurs are poised to enter the global marketplace. In this book, Mark Greeven, George Yip, and Wei Wei offer an insider's view of China's under-the-radar, globally competitive innovators. The authors, all experts on Chinese innovation, distinguish four types of innovators in China: pioneers, large companies that are globally known; hidden champions, midsize enterprises that are market leaders in their niches; underdogs, technology-driven ventures with significant intellectual property; and changemakers, newer firms characterized by digital disruption, exponential growth, and cross-industry innovations. They investigate what kinds of innovations these companies develop (product, process, or business model), their competitive strategies, and key drivers of innovation. They identify six typical ways Chinese entrepreneurs innovate, including swarm innovation (collectively pursuing opportunities) and rapid centralized decision making. Finally, they look at how Chinese innovators are going global, whether building R&D networks internationally or exporting disruptive

business models. The book includes many examples of Chinese innovators and innovations, drawn from a range of companies—from pioneers to changemakers—including Alibaba, Haier, Hikvision, Malong Technology, Weihua Solar, Mobike, and Cheetah Mobile. Greeven, Yip, and Wei offer an essential guide to what makes China a heavyweight competitor in the global marketplace.

Communicating Science Effectively Feb 20 2022 Science and technology are embedded in virtually every aspect of modern life. As a result, people face an increasing need to integrate information from science with their personal values and other considerations as they make important life decisions about medical care, the safety of foods, what to do about climate change, and many other issues. Communicating science effectively, however, is a complex task and an acquired skill. Moreover, the approaches to communicating science that will be most effective for specific audiences and circumstances are not obvious. Fortunately, there is an expanding science base from diverse disciplines that can support science communicators in making these determinations. *Communicating Science Effectively* offers a research agenda for science communicators and researchers seeking to apply this research and fill gaps in knowledge about how to communicate effectively about science, focusing in particular on issues that are contentious in the public sphere. To inform this research agenda, this publication identifies important influences — psychological, economic, political, social, cultural, and media-related — on how science related to such issues is understood, perceived, and used.

Bankruptcy Code Jun 19 2019

Up to Heaven and Down to Hell Oct 16 2021 A riveting portrait of a rural Pennsylvania town at the center of the fracking controversy Shale gas extraction—commonly known as fracking—is often portrayed as an energy revolution that will transform the American economy and geopolitics. But

Williamsport, Pennsylvania, fracking is personal. *Up to Heaven and Down to Hell* is a vivid and sometimes heartbreaking account of what happens when one of the most momentous decisions about the well-being of our communities and our planet—whether or not to extract shale gas and oil from the very land beneath our feet—is largely a private choice that millions of ordinary people make without the public's consent. The United States is the only country in the world where property rights commonly extend "up to heaven and down to hell," which means that landowners have the exclusive right to lease their subsurface mineral estates to petroleum companies. Colin Jerolmack spent eight months living with rural communities outside of Williamsport as they confronted the tension between property rights and the commonwealth. In this deeply intimate book, he reveals how the decision to lease brings financial rewards but can also cause irreparable harm to neighbors, to communal resources like air and water, and even to oneself. *Up to Heaven and Down to Hell* casts America's ideas about freedom and property rights in a troubling new light, revealing how your personal choices can undermine your neighbors' liberty, and how the exercise of individual rights can bring unintended environmental consequences for us all.

Reason and Religion Dec 18 2021 Religion is relevant to all of us, whether we are believers or not. This book concerns two interrelated topics. First, how probable is God's existence? Should we not conclude that all divinities are human inventions? Second, what are the mental and social functions of endorsing religious beliefs? The answers to these questions are interdependent. If a religious belief were true, the fact that humans hold it might be explained by describing how its truth was discovered. If all religious beliefs are false, a different explanation is required. In this provocative book Herman Philipse combines philosophical investigations concerning the truth of religious convictions with empirical research on the origins and functions of religious beliefs. Numerous topics are discussed, such as the his

genesis of monotheisms out of polytheisms, how to explain Saul's conversion to Jesus, and whether any apologetic strategy of Christian philosophers is convincing. Universal atheism is the final conclusion.

International Farm Animal, Wildlife and Food Safety Law May 23 2022 This volume is an inspiring and breakthrough piece of academic scholarship and the first of its kind featuring a comprehensive reader-friendly approach to teach the intricacies of the various aspects of international farm animal, wildlife conservation, food safety and environmental protection law. The selected focus areas are grouped in sections, such as agrobiodiversity, fishing and aquaculture, pollinators and pesticides, soil management, industrial animal production and transportation, and international food trade. Farm animal welfare, environmental protection, biodiversity conservation, and food safety are the core of the selected chapters. Every chapter provides real-world examples to make the complex field easy to understand. With its systematic approach, this book is devoted to anyone interested in the subject, becomes a valuable resource for professionals working in food regulation, and provides a solid foundation for courses and master's programs in animal law, environmental policy, food and agriculture law, and regulation of these subjects around the world. Through its emphasis on sustainable food production, this work offers a cutting-edge selection of evolving topics at the heart of the pertinent discourse. As one of its highlights, this books also provides "Tools for Change," a unique compilation and analysis of laws from the major farm animal product trading nations. With these tools, practitioners, advocates, policy makers and other state-holders are equipped with information to start work toward improving farm animal welfare, wildlife conservation, and food safety through the use of law and policy.

Food Hygiene and Applied Food Microbiology in an Anthropological Cross Cultural Perspective Sep 15 2021 The book demonstrates that food safety is a multidisciplinary scientific discipline that is specifically designed to prevent foodborne illness to consumers. It is generally assumed to be an axiom by both nonprofessionals and professionals alike, that the most developed countries, through their intricate and complex standards, formal trainings and inspections, are always capable of providing much safer food items and beverages to consumers as opposed to the lesser developed countries and regions of the world. Clearly, the available data regarding the morbidity and the mortality in different areas of the world confirms that in developing countries, the prevalence and the incidence of presumptive foodborne illness is much greater. However, other factors need to be taken into consideration in this overall picture: First of all, one of the key issues in developing countries appears to be the availability of safe drinking water, a key element in any food safety strategy. Second, the availability of healthcare facilities, care providers, and medicines in different parts of the

world makes the consequences of foodborne illness much more important and life threatening in lesser developed countries than in most developed countries. It would be therefore ethnocentric and rather simplistic to state that the margin of improvement in food safety is only directly proportional to the level of development of the society or to the level of complexity of any given national or international standard. Besides standards and regulations, humans as a whole have evolved and adapted different strategies to provide and to ensure food and water safety according to their cultural and historical backgrounds. Our goal is to discuss and to compare these strategies in a cross-cultural and technical approach, according to the realities of different socio-economic, ethnical and social heritages.

Smart Computing Applications in Crowdfunding Apr 10 2021

The book focuses on smart computing for crowdfunding usage, looking at the crowdfunding landscape, e.g., reward-, donation-, equity-, P2P-based and the crowdfunding ecosystem, e.g., regulator, asker, backer, investor, and operator. The increased complexity of fund raising scenario, driven by the broad economic environment as well as the need for using alternative funding sources, has sparked research in smart computing techniques. Covering a wide range of detailed topics, the authors of this book offer an outstanding overview of the current state of the art; providing deep insights into smart computing methods, tools, and their applications in crowdfunding; exploring the importance of smart analysis, prediction, and decision-making within the fintech industry. This book is intended to be an authoritative and valuable resource for professional practitioners and researchers alike, as well as finance engineering, and computer science students who are interested in crowdfunding and other emerging fintech topics.

Flooded habitats are a vital part of tropical biology, both for the diversity of the species they house, and the complexity of their ecological interactions, but are often completely overlooked. This book will set the stage for a new wave of research on primates in these extraordinarily productive and highly threatened areas, and is ideal for researchers and graduate students in primatology, zoology, ecology, and conservation.

Contemporary Russian Cinema Dec 26 2019 Analysing films by established directors such as Sokurov and Zel'dovich, as well as lesser-known filmmakers like Balabanov and Kalatozishvili, this book explores the particular style of film presentation that has emerged in Russia since 2000, characterised by its use of highly abstract concepts and visual language.

Recognition, Conflict and the Problem of Global Ethical Community Feb 08 2021 Recognition is a fundamental aspect of all social interactions; between individuals, groups, local communities and sovereign states. Recognition refers to those sociological processes whereby two or more entities (such as states), groups (such as ethnic or cultural communities) or individuals interact with one another and come to understand themselves, and the other, as mutually free individuals: as social agents whose identities, interests and outlooks are equally bound together. Without the foundational act of recognition, relations can become unequal and antagonistic, leading to social pathologies, denigration and even open conflict. This volume brings together leading international scholars of recognition theory in world politics to discuss the potential for recognition to pacify relations between states, groups and individuals and to develop recognition processes in the global community. It examines the implications of recognition theory in helping to understand the problem of conflict and the possibilities of

forging a form of global ethical community. This book was published as a special issue of Global Discourse.

Legal Accountability and Britain's Wars 2000-2015 May 11 2021 This book discusses the manner in which Britain's wars, which took place between 2000 and 2015, have interacted with the relevant principles of international law and English law for the purpose, primarily, of considering legal accountability. During a debate in the House of Lords in 2005 a former Chief of the Defence Staff commented that 'the Armed Forces are under legal siege.' The book will discuss the major legal issues which have arisen, ranging from the various votes in Parliament to go to war, the constitutional relationship between ministers and senior commanders, the right under international law to use force, the influence of human rights law, the role of the courts in England (including the coroners' courts), to the legal regime applying to the conduct of UK military operations. It will assess critically whether the armed forces will now have to accept that operations conducted outside the UK are subject to greater legal scrutiny than previously and whether, if this is the case, it is likely to hinder their future military activities. This book will be of great interest to scholars of international law, the law of armed conflict, military studies and international relations, as well as to those with a professional or other interest in the subject matter.

The SAGE Handbook of Human Rights Jun 24 2022 The SAGE Handbook of Human Rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance. The Handbook will take an inter-disciplinary approach, combining work in such traditional fields as law, political science and philosophy with such non-traditional subjects as climate change, demography, economics, geography, urban studies, mass communication, and business and marketing. In addition, one of the aspects of mainstreaming is the mainstreaming of human rights into all areas of public and private life.

which human rights has come to play a prominent role in popular culture, and there will be a section on human rights in art, film, music and literature. Not only will the Handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements, mechanisms and institutions, but it will seek to go beyond this and produce a book that will help lead to prospective thinking.

Colonial Heritage and Urban Transformation in the Global South

Apr 29 2020 This book traces and analyses the role of heritage in the urban transformation of the city of Cape Town. By looking at discourses of heritage and urban design, the book shows how Cape Town positions itself as an emerging global city in the context of a series of global events. The book points at how a heritage focus on the themes of post-colonial and post-apartheid reconciliation, restitution and memory in the city shifts to a focus on creativity, design and the arts. Thereby showing how traumatic remnants of colonialism and apartheid are reframed as "design challenges". Furthermore, it argues that the idea of a transformed society is projected into a future time and the chaotic present everyday life is left to its own devices. Against this backdrop, the book lays out the opportunities for epistemological reset and decolonial reflection on the city's deep histories, its embedded injustices and traumas that surfaced.

Critical Thinking Jan 27 2020 "Critical Thinking: A Methodology for Interpreting Information 'deconstructs' common errors in thinking and teaches students to become smarter consumers of research results. Written to complement a textbook or a collection of readings, this brief methods book strengthens students' ability to interpret information whenever and wherever data are used. It includes a wide range of examples along with end of chapter exercises for further discussion. This book will be a coursebook for the undergraduate social science courses where critical thinking, numeracy, and data literacy are common learning objectives"--Provided by publisher.

The First Kingdom Dec 06 2020 The bestselling author of The King in the North turns his attention to the obscure era of British history known as 'the age of Arthur'. Somewhere in the shadow time between the departure of the Roman legions in the early fifth century and the arrival in Kent of Augustine's Christian mission at the end of the sixth, the kingdoms of Early Medieval Britain were formed. But by whom? And out of what? In The First Kingdom, Max Adams scrutinizes the narrative of this period handed down to us by later historians and chroniclers. Stripping away the more lurid claims made for a warrior-hero named Arthur, he synthesises the research carried out over the last forty years to tease out the strands of reality from the myth. He reveals how archaeology has delivered evidence of a diverse and dynamic response to Britain's new-found independence, of material and intellectual trade between the Atlantic islands and the rest of Europe, and of the environmental context of those centuries. A skilfully wrought and intellectually probing investigation of the most mysterious epoch in our history, The First Kingdom presents an image of post-Roman Britain whose resolution is high enough to show the emergence of distinct political structures in the sixth century - polities that survive long enough to be embedded in the medieval landscape, recorded in the lines of river, road and watershed, and memorialised in place names. PRAISE FOR MAX ADAMS: 'A triumph. The most gripping portrait of seventh-century Britain that I have read ... A Game of Thrones in the Dark Ages' Tom Holland in The Times on The King in the North 'Gripping, hugely enjoyable and deeply scholarly' History Today, Books of the Year, on The King in the North 'Brilliantly combines history and archaeological research ...
