Architects' Data Jun 27 2019 Neufert's Architects' Data is an essential reference for the initial design and planning of a building project. It provides, in one concise volume, the core information needed to form the framework for the more detailed design and planning of any building project. Organised largely by building type, it covers the full range of preliminary considerations, and with over 6200 diagrams it provides a mass of data on spatial requirements. Most illustrations are dimensioned and each building type includes plans, sections, site layouts and design details. An extensive bibliography and a detailed set of metric/ imperial conversion tables are included. Since it was first published in Germany in 1936, Ernst Neufert's handbook has been progressively revised and updated through 39 editions and many translations. This fourth English language edition is translated from the 39th German edition, and represents a major new edition for an international, English speaking readership. Reviews of the Previous Edition: "Neufert's Architects' Data was the first book I bought when I started my studies in architecture. It was invaluable for me then and it is still a useful aid in my designs." —Cesar Pelli "With this thorough rewrite Neufert has produced yet again an invaluable reference book." —The Architects' Journal

BSA D14 Bantam Workshop Manual & Instruction Manual Sep 30 2019 158 pages, and more than 130 illustrations and charts, size 8.25 x 10.75 inches. This publication is a compilation of two original BSA factory manuals, Workshop Manual (part number 00-4152) and Instruction Manual (part number 00-4140). Both of these manuals are identified by the factory as appropriate for the 4 speed D14/4 Supreme, Sports and Bushman models that were introduced in August 1967. However, this manual hits the 'sweet spot' of the 4 speed Bantam series, as both the earlier D10 Sports and Bushman 4 speed models (1966 to 1967) and the later D175 (1969 to 1971) share many of the same design attributes and mechanical components. For information on the earlier 1948 to 1966 models, the BSA Bantam 'Service Sheet Manual' (ISBN 9781588502506) is recommended. It contains 42 service sheets (150 pages) that cover the 1948 to 1966 rigid, spring frame, swing arm D1, D3, D5 and D7 Bantam. However, as the prior year D7 was effectively identical to the 1966-1967 D10 Silver and Supreme models this manual will be of use to owners of those models also. The reader may also find 'The Book of the BSA Bantam' (ISBN 9781588502100) useful as it covers all Bantam models from 1948 to 1971. It should be noted that BSA model years ran from August through July. For example, the 1968 models were released in August 1967, the 1969 models in August 1968 etc. VelocePress.com has been publishing reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews worldwide so you can be assured you are purchasing a quality product. We encourage you to exercise caution when purchasing a manual for your motorcycle as many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned', 'used' or even 'refurbished'! In addition, they are often advertised for the incorrect series and/or model years of motorcycles.

Honda Motorcycles Workshop Manual 125-150 Twins 1959-1966 Apr 17 2021 A faithful reproduction of the 1967 Floyd Clymer publication of the official Honda Factory Workshop Manual for the 125-150 series C92, CS92, CB92, C95 and CA95. There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 228 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.
