The Battle for the Buffalo River Jul 25 2019 Under the auspices of the 1938 Flood Control Act, the U.S. Corps of Engineers began to pursue an aggressive dam-building campaign. A grateful public generally lauded their efforts, but when they turned their attention to Arkansas's Buffalo River, the vocal opposition their proposed projects generated dumbfounded them. Never before had anyone challenged the Corps's assumption that damming a river was an improvement. Led by Neil Compton, a physician in Bentonville, Arkansas, a group of area conservationists formed the Ozark Society to join the battle for the Buffalo. This book is the account of this decade-long struggle that drew in such political figures as supreme court justice William O. Douglas, Senator J. William Fulbright, and Governor Orval Faubus. The battle finally ended in 1972 with

President Richard Nixon's designation of the Buffalo as the first national river. Drawing on hundreds of personal letters, photographs, maps, newspaper articles, and reminiscences, Compton's lively book details the trials, gains, setbacks, and ultimate triumph in one of the first major skirmishes between environmentalists and developers.

Prairie Jan 11 2021 Thorough, detailed, and scientifically up-to-date, *Prairies: A Natural History* provides a comprehensive nontechnical guide to the biology and ecology of the prairies, or the Great Plains grasslands of North America, offering a view of the past, a vision for the future, and a clear focus on the present. With a total area of more than 3.5 million square kilometers (500,000 in Canada and the remainder in the United States), the prairies occupy the heartland of the continent, a vast, windswept plain that flows from Alberta south to Texas and from the Rockies east to the Mississippi River. This is big sky country—the largest ecosystem in North America and, until recently, one of the richest and most magnificent natural grasslands in the world. Today, however, the North American prairies are among the most altered environments on Earth.
