The Good Neighbour: Volume 5, The Official History of Australian Peacekeeping, Humanitarian and Post-Cold War Operations Mar 29 2022 The Good Neighbour explores the Australian government's efforts to support peace in the Pacific Islands from 1980 to 2006. It tells the story of the deployment of Australian diplomatic, military and policing resources at a time when neighbouring governments were under pressure from political violence and civil unrest. The main focus of this volume is Australian peacemaking and peacekeeping in response to the Bougainville Crisis, a secessionist rebellion that began in late 1988 with the sabotage of a major mining operation. Following a signed peace agreement in 2001, the crisis finally ended in December 2005, under the auspices of the United Nations. During this time Australia's involvement shifted from behind-the-scenes peacemaking, to armed peacekeeping intervention, and finally to a longer-term unarmed regional peacekeeping operation. Granted full access to all relevant government files, Bob Breen recounts the Australian story from decisions made in Canberra to the planning and conduct of operations.

Australian-Latin American Relations Jun 07 2020 Until recently, Australia and Latin America were considered irrelevant to one another. The prevailing perception in Australia had been that Latin America was too remote, disconnected, and politically irrelevant to warrant serious scholarly or public attention. In recent years, this perception has rapidly changed, with Australian universities seeking to attract Latin American students, new diplomatic relations emerging, investment in mining

and other business sectors expanding, and a growing fascination in Australia with Latin American food, music, dance and other forms of popular culture. This pioneering interdisciplinary book ventures into the new space of Australian-Latin American relations, exploring multiple dimensions of the rapidly changing landscape within a global context.

Port State Jurisdiction and the Regulation of International Merchant Shipping Jul 29 2019

This book examines the concept of port state jurisdiction in the context of international maritime law. In particular the book focuses on situations where port states have used their jurisdiction over visiting foreign-flagged vessels to apply unilateral domestic law, as compared with the internationally-agreed standards enforced by regional port state control organisations. To illustrate the legal issues involved three recent pieces of legislation are analysed in detail: the United States' Cruise Vessel Security and Safety Act 2010, the EU's liability insurance directive of 2009, and Australia's Fair Work Act 2009. Key issues include the legality of port states' attempts to regulate aspects of a vessel's structure or equipment, or even certain activities that may take place before a vessel's arrival in port. The author argues that examples of unilateral measures being imposed by way of port state jurisdiction are growing, and that without active protests from flag states this concept will continue to expand in scope. As international law currently presents very few restrictions on the actions of ambitious port states, such developments may have a significant impact on the future of international maritime regulation.
