Two volumes. xiii, 774; x, 780 pp. Reprinted 2002 by The Lawbook Exchange, Ltd. LCCN 00-065554. ISBN 1-58477-129-1. Cloth. \$250. \* Curtis [1812-1894] was a prominent New York patent attorney whose interest in Constitutional matters led to the publication of two works on the subject. Of this, arguably his most important, DAB praises it as "...likely to remain standard. This work is the classic treatment of the Constitution from the Federalist, Websterian point of view." Dictionary of American Biography II:614. Volume I is a revised edition of his first, highly-regarded work on the subject, History of the Origin, Formation, and Adoption of the Constitution of the United States that was originally published in 1854 and often cited by the Supreme Court. Volume II was edited posthumously from the author's notes, covers the period from the adoption of the Constitution to the close of the Civil War and includes a substantial appendix. The appendix includes numerous historical documents such as The Provisional and Final Constitutions of the Federal States, various anti-slavery tracts published circa 1833, an Analytical Index to the Constitution of the United States and the Amendments thereto, a Bibliography of the Constitution compiled and annotated by Paul Leicester Ford in 1896, which incidentally

**Hard Lessons** Dec 22 2021 Product Description: The billions of dollars expended in Iraq constitute the largest relief and reconstruction exercise in American history. SIGIR's lessons learned capping report characterizes this effort in four phases (pre-war to ORHA, CPA, post-CPA/Negroponte era, and Khalilzad, Crocker, and the Surge). From this history, SIGIR forwards a series of conclusions and recommendations for Congress to consider when organizing for the next post-conflict reconstruction situation. Over the past five years, the United States has provided nearly fifty billion dollars for the relief and reconstruction of Iraq. This unprecedented rebuilding program, implemented after the March 2003 invasion, was developed to restore Iraq's essential services, build Iraq's security forces, create a market-based economy, and establish a democratic government--all in pursuit of U.S. interests in a stable and free Iraq. Did the U.S. rebuilding program achieve its objectives? Was the money provided well-spent or wasted? What lessons have we learned from the experience? **Hard Lessons: The Iraq Reconstruction Experience**, a report from the Special Inspector General for Iraq Reconstruction (SIGIR), answers these and other important questions by presenting a comprehensive history of the U.S. program, chiefly derived from SIGIR's body of extensive

oversight work in Iraq, hundreds of interviews with key figures involved with the reconstruction program, and thousands of documents evidencing the reconstruction work that was - or was not - done. The report examines the limited pre-war planning for reconstruction, the shift from a large infrastructure program to a more community-based one, and the success of the Surge in 2007 and beyond. **Hard Lessons** concludes that the U.S. government did not have the structure or resources in place to execute the mammoth relief and reconstruction plan it took on in 2003. The lessons learned from this experience create a basis for reviewing and reforming the U.S. approach to contingency relief and reconstruction operations.

**Equitable Principles of Maritime Boundary Delimitation** Sep 18 2021 Equity emerged as a powerful symbol of aspired redistribution in international relations. Operationally, it has had limited impact in the Westphalian system of nation states - except for maritime boundary delimitations. This book deals with the role of equity in international law, and offers a detailed case study on maritime boundary delimitation in the context of the enclosure movement in the law of the sea. It assesses treaty law and the impact of the United Nations Convention on the Law of the Sea. It depicts the process of trial and error in the extensive case law of the International Court of Justice and arbitral tribunals and expounds the underlying principles and factors informing the methodology both in adjudication and negotiations. Unlike other books, the main focus is on equity and its implications for legal methodology, in particular offering further guidance in the field of international economic law.
