[Crossover](#) Aug 10 2020 [Crossover](#) is a laboratory manual and computer program that work together to teach the principles of genetics. Designed to complement regular textbooks and classroom instruction, [Crossover](#) consists of thirty-five modules that can be tailored to fit genetics courses at several levels. Examples, interactive computer models, problems, and self-tests all help students understand difficult concepts and learn the basic mathematical skills needed to study contemporary theories of genetics, evolution, and breeding. The easy-to-use tutorial system lets students work at their own pace. Features include: - In-depth investigations of meiosis, genetic ratios, linkage mutation, natural selection, Hardy-Weinberg equilibrium, artificial selection, quantitative genetics, breeding methods, mating designs, plant patent law, and the use of molecular markers - A computer model that allows students to manipulate genetic parameters and compare outcomes. Students can observe evolution and artificial selection in action - A "Major Concepts" section at the beginning of each chapter to help students focus on the important material to be learned - A visual, easy-to-understand presentation of material - Exercises based on genetic data and analyses from actual research projects - Several stages of complexity within each area of instruction. - Instant grading of exercises - "Suggested Readings" at the end of each chapter to direct the student to related books, articles, and computer programs.

[Implementing a Comprehensive Research Compliance Program](#) Oct 12 2020 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment. These administrators are tasked with a special challenge: ensuring that their institutions conduct safe, ethical, and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals. These competing responsibilities can make the role of the research administrator complex; however, those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field. Thus, the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs. Previous volumes on these topics have focused primarily on educating research faculty, staff, and students. An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator; yet, the books have limited guidance intended for the senior research administrators themselves. This handbook is designed, therefore, to serve as a detailed program implementation manual for these administrators, who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research, as well as upper administration and others interested in safe, ethical, and compliant research.

Preventing Black Market Trade in Nuclear Technology Aug 29 2019 Every nuclear weapons program for decades has relied extensively on illicit imports of nuclear-related technologies. This book offers the most detailed public account of how states procure what they need to build nuclear weapons, what is currently being done to stop them, and how global efforts to prevent such trade could be strengthened. While illicit nuclear trade can never be stopped completely, effective steps to block illicit purchases of nuclear technology have sometimes succeeded in slowing nuclear weapons programs and increasing their costs, giving diplomacy more chance to work. Hence, this book argues, preventing illicit transfers wherever possible is a key element of an effective global non-proliferation strategy.

Ethan Frome May 07 2020 In dem freudlosen, abgeschiedenen Ort Starkfield in Neuengland, der die meiste Zeit des Jahres im Schnee versinkt, sind auch die Gefühle der Menschen zu Eis erstarrt. Die Pulitzerpreisträgerin Edith Wharton erzählt von einer untergegangenen Welt, die in den Figuren ihres berührenden Romans erschreckend lebendig wird. Den Farmer Ethan Frome verbindet eine Dreiecksbeziehung mit seiner Frau und deren jüngerer Cousine Mattie. Ihr Leben ist geprägt von Liebe und Einsamkeit, von sexueller Frustration und moralischer Verzweiflung. Eine archetypische Geschichte von leidenschaftlichem Aufbegehren und tragischer Passivität, von Sprachlosigkeit und der Unfähigkeit, dem Schicksal zu entrinnen. Ein kompositorisches Meisterwerk, pure Erzählmagie!

Handbook of Compliance & Integrity Management Mar 17 2021 This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management – which fosters alternatives such as greater trust in self-regulation and market discipline – the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the *raison d'être* of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE-The Netherlands in Rotterdam, and program coordinator and lecturer at the same Postgraduate Education in Amsterdam.
