Die Erfindung des Bruttosozialprodukts Apr 17 2021 Das Buch untersucht die Kontroversen um das Bruttosozialprodukt und seine Bedeutung für die Weltpolitik.

Psychopharmacology in British Literature and Culture, 1780-1900 Aug 29 2019 This collection of essays examines the way psychoactive substances are described and discussed within late eighteenth- and nineteenth-century British literary and cultural texts. Covering several genres, such as novels, poetry, autobiography and non-fiction, individual essays provide insights on eighteenth- and nineteenth-century understandings of drug effects of opium, alcohol and many other plant-based substances. Contributors consider both contemporary and recent medical knowledge in order to contextualise and illuminate understandings of how drugs were utilised as stimulants, as relaxants, for pleasure, as pain relievers and for other purposes. Chapters also examine the novelty of experimentations of drugs in conversation with the way literary texts incorporate them, highlighting the importance of literary and cultural texts for addressing ethical questions.

Connecting Literature and Science Jul 09 2020 This book presents a case for engagement between the sciences and the humanities. The author, a professional chemist, seeks to demonstrate that the connections between those fields of intellectual activity are far more significant than anything that separates them. The book combines a historical survey of the relationships between science and literature with a number of case studies that examine specific scientific episodes—several drawn from the author's own research—juxtaposed with a variety of literary works spanning a wide range of period and genre—Dante to detective fiction, War and Peace to White Teeth—to elicit their common themes. The work argues for an empirical, non-theory-based approach, one that is closely analogous to connectionist models of brain development and function, and that can appeal to general readers, as well as to literary scholars and practicing scientists, who are open to the idea that literature and science should not be compartmentalized.

Utopian Literature and Science Jul 21 2021 Scientific progress is usually seen as a precondition of modern utopias, but science and utopia are frequently at odds. Ranging from Galileo's observations with the telescope to current ideas of the post-human and the human-animal boundary, this study brings a fresh perspective to the paradoxes of utopian thinking since Plato.

When Judaism Meets Science Nov 24 2021 This book seeks to confront the challenge that science presents to the traditional pillars of Judaism. It identifies and analyzes a wide variety of issues, including some contemporary sacred cows. First, the book considers what is fact and what is fiction in the primary stories contained in Judaism's foundational texts. Then, drawing on Jewish ethical teachings, it seeks to determine how Judaism and science can inform each other with respect to a broad range of contemporary issues, from abortion and allergies to vaccinations and violence with firearms. Finally, it peeks into the future to address issues that Judaism and science are just now beginning to discuss, such as an exotheology for aliens on distant planets, a Jewdroid who seeks acceptance in a shul, and even the fate of the universe itself. *When Judaism Meets Science* addresses readers of all persuasions—regardless of denomination and whether a believer or not—as the author builds a case, with specific recommendations, for the value of a reality-based Judaism, one grounded on both traditional ethics and empirical evidence that can resonate with the educated adults of Israel.

Compilation of Public Laws Reported by the Committee on Science, Space, and Technology, 1958-1988 Apr 05 2020

Museum of Foreign Literature and Science Mar 17 2021

Interdisciplinary Language Arts and Science Instruction in Elementary Classrooms Nov 12 2020 Publisher description

Variety in Religion and Science Dec 26 2021 Each day will bring to your recall some person or event in the world of religion or philosophy as well as one from the field of science. Little by little you will become aware of the rich heritage of the human family. And all these are only samples from the treasure-house of religion and science.

Discourse and Politics Oct 31 2019 Drawing on political discourse from a wide range of settings and perspectives, this book is set to provide a descriptive and analytical tool for examining political discourse and will be welcomed by anyone interested in discourse analysis in general, and in political discourse in particular. Topics covered in this book include the study of political discourse styles, the use of rhetorical strategies (vocabulary, metaphors, quotations, parentheticals, etc.), the relation between political discourse and society (legitimation, the private-public interface, identities), role of gestures in relation to speech, methods for analysing political discourse, and how to build and exploit a political language corpus.

Between Literature and Science Oct 12 2020 Through close analysis of *Eureka* and *The Purloined Letter*, Swirski evaluates Poe's epistemological theses in the light of contemporary philosophy of science and presents literary interpretation as a cooperative game played by the author and reader, thereby illuminating how we read fiction. The analysis of Poe's little-studied *Eureka* provides the basis for his discussion of Lem's critique of scientific reductionism and futurological forecasts. Drawing on his own interviews with Lem as well as analysis of his works, Swirski considers the author's scenarios involving computers capable of creative acts and discusses their socio-cultural implications. His analysis leads to bold arguments about the nature of literature and its relation to a broad range of other disciplines.

Museum of Foreign Literature and Science Jan 15 2021

Multimodal Approaches to Research and Pedagogy Sep 22 2021 This book brings together social semiotics, cultural studies, multiliteracies, and other approaches in order to theorize very different learning environments, giving visibility to the modal effect in a range of disciplines. It highlights the ideological nature of discursive practices, examines questions of access, and argues for transformation of these practices, with a constant eye on issues of social justice and equity. Contributors argue that we can harness learners' representational resources through making these resources visible, and creating less regulated spaces in the curriculum in which they can be used. Examples from primary education through to adult continuing education are used throughout the text.

Indicators for Monitoring Mathematics and Science Education Sep 30 2019 This report contains a collection of papers summarizing the major research on elementary and secondary schooling conducted over the past decade, and outlining what those studies suggest for designing improved educational indicators. The report includes a section on the design of educational indicator systems. It also includes sections on indicators of educational resources and commitment; school context and organization; teachers and teaching; curriculum; instruction; outcomes, achievement, participation, and attitudes; the distribution of educational opportunities and outcomes; policy problems; and school completion and dropouts. Finally, it discusses the policy context in which indicators are generated and used.

Philosophie und Wissenschaft bei Hermann Cohen/Philosophy and Science in Hermann Cohen Dec 02 2019 Der Band versammelt einen Großteil der Beiträge, die internationale Experten anlässlich der Tagung „Philosophie und Wissenschaft bei Hermann Cohen“ im November 2014 am Institut Wiener Kreis der Universität Wien präsentiert haben. Mit der Tagung zu Hermann Cohen (1842 - 1918), der zusammen mit Paul Natorp die Marburger Schule begründete, wurden zwei Ziele verfolgt: erstens die Aspekte in der Philosophie des Kantianers Cohen herauszuarbeiten, die an die Idee einer Einheitswissenschaft anknüpfen und zweitens Divergenzen und Übereinstimmungen Cohens mit der wissenschaftlichen Weltanschauung, der Programmatik des Wiener Kreises um Rudolf Carnap und Moritz Schlick zu identifizieren. Der Tagungsband ist in drei Teile gegliedert. Die Aufsätze im ersten Teil beschäftigen sich mit der Bedeutung von Erfahrung und Empirismus für das Philosophieverständnis Hermann Cohens. Im zweiten Teil gehen die Autoren der Frage nach, welche Rolle Theorien aus den Bereichen Mathematik, Naturwissenschaften und Psychologie für Cohens Denken gespielt haben - unter anderem Hermann von Helmholtz' Theorie des Messens und die Bedeutung der Infinitesimalrechnung für die Philosophie der Marburger Schule. Die Beiträge im dritten Teil des Bandes stellen die Philosophie Cohens und der Marburger Schule den Vertretern des Wiener Kreises und der Berliner Gruppe um Hans Reichenbach gegenüber. Dabei wird Reichenbachs Rezeption der Relativitätstheorie in den Kontext einer Relativierung Kants bei Cohen und Ernst Cassirer gestellt und „versteckte Verwandtschaften“ zwischen Cohen und dem Logischen Empirismus aufgedeckt. Der Band richtet sich an Wissenschaftler auf dem Gebiet der Geschichte der Philosophie.

How Finns Learn Mathematics and Science Dec 14 2020 The book tries to explain the Finnish teacher education and school system as well as Finnish children's learning environment at the level of the comprehensive school, and thus give explanations for the Finnish PISA success. The book is a joint enterprise of Finnish teacher educators.

On Art and Science Feb 25 2022 Einstein once remarked "After a certain high level of technical skill is achieved, science and art tend to coalesce in aesthetics, plasticity, and form. The greatest scientists are always artists as well". In this volume, some of the world's leading thinkers come together to expound on the interrelations between sciences and arts. While one can segregate art and place it outside the scientific realm, it is, nevertheless, inextricably linked to our essential

cognitive/emotional/perceptual modalities and abilities, and therefore lies alongside and in close contact with the method of science and philosophy. What inspiration can scientists draw from art and how can scientific spirit foster our understanding and creation of aesthetic works? How are art and science grounded in our cognition? What role does perception play in science and art? Are criteria for beauty in art and science the same? How does evolution shape our understanding of art? How do science, art and scientific-artistic frameworks shape society as a whole and help us address its pressing issues? The epistemological and ontological aspects haunt artists, philosophers and scientists alike. The essays in this volume address these manifold questions while also elucidating the pragmatic role they play in our daily life.

Seed, Soil, and Science Jul 29 2019

Art and Science (Second Edition) Aug 02 2022 An abundantly illustrated history of the dynamic interaction between the arts and sciences, and how it has shaped our world. Today, art and science are often defined in opposition to each other: one involves the creation of individual aesthetic objects, and the other the discovery of general laws of nature. Throughout human history, however, the boundaries have been less clearly drawn: knowledge and artifacts have often issued from the same source, the head and hands of the artisan. And artists and scientists have always been linked, on a fundamental level, by their reliance on creative thinking. *Art and Science* is the only book to survey the vital relationship between these two fields of endeavor in its full scope, from prehistory to the present day. Individual chapters explore how science has shaped architecture in every culture and civilization; how mathematical principles and materials science have underpinned the decorative arts; how the psychology of perception has spurred the development of painting; how graphic design and illustration have evolved in tandem with methods of scientific research; and how breakthroughs in the physical sciences have transformed the performing arts. Some 265 illustrations, ranging from masterworks by Dürer and Leonardo to the dazzling vistas revealed by fractal geometry, complement the wide-ranging text. This new edition of *Art and Science* has been updated to cover the ongoing convergence of art and technology in the digital age, a convergence that has led to the emergence of a new type of creator, the "cultural explorer" whose hybrid artworks defy all traditional categorization. It will make thought-provoking reading for students and teachers, workers in creative and technical fields, and anyone who is curious about the history of human achievement.

Philosophie und Wissenschaft / Philosophy and Science May 31 2022 The contributions to volume 8 of the *Internationales Jahrbuch des Deutschen*

Idealismus/International Yearbook of German Idealism pursue from various perspectives the multifarious relations of German Idealism to the natural sciences and mathematics. The concepts of nature and of the basis for mathematics develop complexly in German philosophy after Kant. At issue are: the foundation of mathematics; the relation of freedom to nature; the significance of philosophy to emerging research in biology, chemistry, and physics, and reconsideration of the thought of Leibniz and Spinoza. Contributors: Gideon Freudenthal, Michael Friedman, Hans-Peter Neumann, Wolfgang Neuser, Konstantin Pollok, Sebastian Rand, Pirmin Stekeler-Weithofer, Thomas Sturm, Lars-Thade Ulrichs, Eric Watkins, John Zammuto, Paul Ziche, Rachel Zuckert

La science et le monde moderne d'Alfred North Whitehead? May 07 2020 The second international Chromatiques whiteheadiennes conference was devoted exclusively to the exegesis and contextualization of Whitehead's *Science and the Modern World* (1925). In order to elucidate the meaning and significance of this epoch-making work, the *Proceedings* are designed to form "companion" volume. With one paper devoted to each of its thirteen chapters, the *Proceedings* aim, on the one hand, to identify the specific contribution of each chapter to Whitehead's own research program - that is to say, to put its categories into perspective by means of an internal analysis- and, on the other hand, to identify its global impact in the history of ideas.

Wie ökonomisches Wissen wirksam wird Jun 07 2020 Die Erforschung der Performativität der Wirtschaftswissenschaft gehört heute zum Kanon der neueren Wirtschaftssoziologie. Das essential verfolgt die Performativitätsforschung in ihrer Entstehung aus der Akteur-Netzwerk-Theorie zurück und rekonstruiert die zentralen Annahmen ihrer Haupttexte. Auf der Grundlage einschlägiger Kritiken dieses Forschungsprogramms, ausgewählter Beispiele daran anschließender Studien sowie analytischer Desiderata wird ein möglicher analytischer Richtungswechsel der Performativitätsforschung diskutiert. Dies ist mit dem Plädoyer für eine Soziologie ökonomischen Wissens als empirische Verwendungs- und Wirkungsforschung verbunden. Der Autor Dr. Jan Sparsam ist wissenschaftlicher Mitarbeiter im Projekt „Vom Modell zur Steuerung. Der Einfluss der Wirtschaftswissenschaft auf die politische Gestaltung der Finanzmärkte durch Zentralbanken“ am Institut für Soziologie der LMU München.

Sasquatch: Legend Meets Science Nov 05 2022 In this landmark work on a subject too often dismissed as paranormal or disreputable, Jeff Meldrum gives us the first book on sasquatch to be written by a scientist with impeccable academic credentials, an objective look at the facts in a field mined with hoaxes and sensationalism. Meldrum reports on the work of a team of experts from a wide variety of fields who were assembled to examine the evidence for a large, yet undiscovered, North American primate. He reviews the long history of this mystery--which long predates the "bigfoot" flap of the late fifties--and explains all the scientific pros and cons in a clear and accessible style, amplified by over 150 illustrations. Anyone who has pondered the mysteries of human evolution will be fascinated and eager to join Dr. Meldrum in drawing their own conclusion. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Participatory Action Research Jun 19 2021 Fully revised and updated, this second edition of *Participatory Action Research (PAR)* provides new theoretical insights and many robust tools that will guide researchers, professionals and students from all disciplines through the process of conducting action research 'with' people rather than 'for' them or 'about' them. PAR is collective reasoning and evidence-based learning focussed on social action. It has immediate relevance in fields ranging from community development to education, health, public engagement, environmental issues and problem solving in the workplace. This new edition has been extensively revised to create a user-friendly textbook on PAR theory and practice, including: updated references and a comprehensive overview of different approaches to PAR (pragmatic, psychosocial, critical); more emphasis on the art of process design, especially in complex social settings characterized by uncertainty and the unknown; developments in the use of Web2 collaborative tools and digital strategies to support real-time data gathering and processing; updated examples and stories from around the world, in a wide range of fields; critical commentaries on major issues in the social sciences, including stakeholder theory, systems thinking, causal analysis, monitoring and evaluation, research ethics, risk assessment and social innovation. This modular textbook provides novel perspectives and ideas in a longstanding tradition that strives to reconnect science and the inquiry process with life in society. It provides coherent and critical treatment of core issues in the ongoing evolution of PAR, making it suitable for a wide range of undergraduate and postgraduate courses. It is intended for use by researchers, students and working professionals seeking to improve or rethink their approach to co-creating knowledge and supporting action for the well-being of all.

The Art and Science of Mental Health Nursing Feb 13 2021 This comprehensive nursing text has been fully and extensively updated for this third edition, and offers students a complete guide to the art and science of mental health nursing. The book combines theory and practice to look in-depth at: Different 'types' of mental health problems ; Different therapeutic interventions ; The practical tools of nursing such as risk, assessment, problem solving ; Key themes such as ethics, law and professional issues.

Governing Carbon Dioxide Removal Sep 10 2020

Where God and Science Meet Sep 03 2022 Explains in clear terms the new findings and evidence fathered on the science of religion - neuroscience, evolutionary and cognitive science - featuring some of the most noted authorities in the new field of neurotheology.

Handlung und Wissenschaft - Action and Science Oct 04 2022 Im Mittelpunkt des vorliegenden Bandes steht die Untersuchung des Selbstverständnisses der praktischen Wissenschaften, wie es sich im 13. und 14. Jahrhundert im Umkreis der Höheren Fakultäten der Universität sowie insbesondere innerhalb der Philosophie artikuliert. Die Frage nach der Wissenschaftsfähigkeit des überlieferten juristischen und medizinischen Wissens sowie jene nach dem wissenschaftlichen Anspruch der Praktischen Philosophie, insbesondere der philosophischen Ethik, und der Theologie, verstanden als einer "scientia practica", beschreiben die Herausforderung, mit der sich die hier behandelten Autoren und Texte des Mittelalters beschäftigen. Insbesondere werden in den in diesem Band versammelten Einzeluntersuchungen die Beiträge von Albert dem Großen, Thomas von Aquin, Johannes Duns Scotus und Wilhelm von Ockham zur Frage einer philosophischen Begründung des Status des menschlichen Handlungswissens und der praktischen Wissenschaften gewürdigt.

Hermeneutics and Science Aug 22 2021 *Proceedings of the First Conference of the International Society for Hermeneutics and Science*

Nobel And Lasker Laureates Of Chinese Descent: In Literature And Science Mar 05 2020

Philosophy of Science and the Occult Feb 02 2020 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science. Placed in the context of the occult, philosophy of science issues become immediately understandable and forcefully compelling. Divergent views on astrology, parapsychology, and quantum mechanics mysticism emphasize topics standard to the philosophy of science. Such issues as confirmation and selection for testing, causality and time, explanation and the nature of scientific laws, the status of theoretical entities, the problem of demarcation, theory and observation, and science and values are discussed. Significantly revised, this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N. David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics. A more complete and current review of research on astrology has been included in this new edition, and the section on the problem of demarcation has been broadened. Patrick Grim is Associate Professor of Philosophy at the State University of New York at Stony Brook. He has coedited eleven volumes of *The Philosopher's Annual* and has published a number of articles on logic and contemporary metaphysics, philosophy of religion, and ethics.

Government and Science Mar 29 2022

Als das Licht laufen lernte Jun 27 2019 Die Geschichte des Universums, erfrischend anders erzählt Daniela Leitner folgt ihrer Faszination für astronomische und kosmologische Fragen und begibt sich auf eine instruktiv-vergnügsliche Reise in die Welt der Physik, rückwärts in der Zeit, dem Licht auf der Spur, vor heute bis zum Urknall. Eine umfassende Geschichte des Universums in bildhafter, dem Alltagsleben entlehnter Sprache und mit höchst anschaulichen Beispielen, »dass man als Profi einfach nur staunen kann. Und das Tollste ist, es ist alles richtig (Harald Lesch)!« Unbekümmert und mit Lust an der Erkenntnis hat die Autorin das Schwere leicht genommen, hat gewagt, das Hochkomplexe mit Witz, Fantasie und mit Bildern aus ihrem Alltag begreifbar zu machen.

Proceedings of the Standing Senate Committee on Health, Welfare and Science Oct 24 2021

Law and Science Jan 03 2020 This reader is a spin-off publication from *Law, Science and Medicine, Third Edition*. It gives students a fascinating and stimulating set of readings that introduces them to the way law and science shape society from the use and misuse of genetic information, to religion and science, to artificial intelligence, and beyond. This publication gives undergraduates direct and accessible access to the actual cases, statutes, and articles that shape society.

relationship to science. The readings on controversial issues^e such as genetic research or creationism vs. evolution^e will spark lively discussion and intense intellectual engagement.

Pierre Gassendi's Philosophy And Science Jan 27 2022 This study of Gassendi's philosophy and science puts forth the view that his atomism follows from his empiricism: as an outgrowth of our best theory of knowledge and sound scientific method, we get evidence that warrants the micophysical theory.

Archaeology Meets Science Apr 29 2022 The 'Archaeology meets Science' project is currently transforming our understanding of the Minoan and Mycenaean civilisations, through the in-depth application of state of the art scientific analyses to ceramic artefacts and skeletal material. This book is the fruit of this acclaimed research, which was carried out between 1997 and 2003, and presented in an exhibition in a number of museums across Europe and the United States, starting with the National Archaeological Museum in Athens. Moving beyond the standard archaeological format of illustrations with descriptions of contexts, the book analyses each object from the inside, and consequently each has a different story to tell. Organic residue and stable isotope analysis has extended our knowledge beyond anything previously gleaned through conventional archaeological research, and we now have a much better understanding of the food and drink consumed by ordinary people in Bronze Age Greece. There are some fascinating insights, such as the origin of modern Greek retsina, which was traced first to the time of Agamemnon, then to Crete in the 17th century BC and finally to the Early Minoan Period, c. 2000 BC. The book provides the primary scientific evidence on which the world renowned scientists who have carried out this work have based their conclusions.

The Routledge Companion to Literature and Science May 19 2021 With forty-four newly commissioned articles from an international cast of leading scholars, *The Routledge Companion to Literature and Science* traces the network of connections among literature, science, technology, mathematics, and medicine. Divided into three main sections, this volume: links diverse literatures to scientific disciplines from Artificial Intelligence to Thermodynamics surveys current theoretical and disciplinary approaches from Animal Studies to Semiotics traces the history and culture of literature and science from Greece and Rome to Postmodernism. Ranging from classical origins and modern revolutions to current developments in cultural science studies and the posthumanities, this indispensable volume offers a comprehensive resource for undergraduates, postgraduates, and researchers. With authoritative, accessible, and succinct treatments of the sciences in their literary dimensions and cultural frameworks, here is the essential guide to this vibrant area of study.

The Guidebook of Federal Resources for K-12 Mathematics and Science Aug 10 2020 Contains directories of federal agencies that promote mathematics and science education at elementary and secondary levels; organized in sections by agency name, national program name, and state highlights by region.

Erkenntnis und Wissenschaft/ Knowledge and Science Jul 01 2022 Im Zentrum des Bandes steht die Frage nach dem Zusammenhang von Erkenntnis- und Wissenschaftstheorie im Kontext der mittelalterlichen Rezeption der Texte des Aristoteles an Hof und Universitäten, insbesondere der für die Epistemologie einschlägigen Passagen in "De anima" und in den "Zweiten Analytiken" sowie ihre spätantike und arabische Vermittlung. In diesem komplexen Rezeptions- und vor allem Transformationsprozeß werden zugleich die wissenschaftlichen und gesellschaftlich-institutionellen Grundlagen für den okzidentalen Prozeß der Rationalisierung und Aufklärung gelegt, deren "Dialektik" nicht nur die Geschichte Europas bis zum heutigen Tag bestimmt.
