*The Tim Carmody Affair* Jul 28 2022 When Tim Carmody was appointed Chief Justice of Queensland by Premier Campbell Newman in 2014, he had been Chief Magistrate for only nine months. It proved to be the most controversial judicial appointment in Australia's history. Carmody's elevation plunged the Supreme Court and the legal profession into a bitter conflict with the government and with Carmody himself. How did he come to be appointed to such a significant position? What can we learn from this saga about the fragile relationships between politics and the courts? The *Tim Carmody Affair* places the full story of Carmody's damaging and divisive tenure in context, and identifies key reforms that could prevent this kind of controversy in the future. 'A spellbinding and alarming account of one of Australia's great judicial dramas that ruptured the legal profession and the courts. The Newman Government's appointment of Tim Carmody as Queensland's Chief Justice is a story of patronage, betrayal, leaking, and political folly. Brilliant and revealing.' — Richard Ackland

**Rethinking Gender in Revolutions and Resistance** Dec 09 2020 Ever since the uprisings that swept the Arab world, the role of Arab women in political transformations received unprecedented media attention. The copious commentary, however, has yet to result in any serious study of the gender dynamics of political upheaval. *Rethinking Gender in Revolutions and Resistance* is the first book to analyse the interplay between moments of sociopolitical transformation, emerging subjectivities and the different modes of women's agency in forging new gender norms in the Arab world. Written by scholars and activists from the countries affected, including Palestine, Egypt, Tunisia and Libya, this is an important addition to Middle Eastern gender studies.

**Masculinity in Breaking Bad** Sep 05 2020 Following on author Peter Rollins' motto "If it isn't popular, it isn't culture," this collection of new essays considers Vince Gilligan's award-winning television series *Breaking Bad* as a landmark of Western culture--comparable to the works of Shakespeare and Dickens in their time--that merits scholarly attention from those who would understand early the 21st century zeitgeist. The essays explore the series as a critique of American concepts of masculinity, with Walter White discussed as a father archetype--provider,

protector, author of a legacy--and as a Machiavellian warrior on the capitalist battleground. Other topics include the mutual exclusivity of intellect and masculinity in American culture, and the dramatic irony as White's rationales for his criminal life are gradually revealed as a lie. In "round table" chapters, contributors discuss the show's reception, fans who root for "Team Walt," "Skyler-hating" and Breaking Bad as a feminist text.

**Fukushima and Civil Society** Aug 29 2022 This book analyzes the impact of the Fukushima disaster on civil society in Japan with particular attention to the anti-nuclear movement, focusing on its development, repertoire of action, mobilization strategies, modes of operation, and impact on the state's energy policy. Combining social movement theory and civil society theory, the author draws on extensive fieldwork in Japan to explore the context of the sociopolitical situation in Japan up to the Fukushima accident and to offer a typological description and analysis of the anti-nuclear movement that emerged after the disaster. Through an analysis of the relationship between the power elite and the anti-nuclear movement organizations, this volume considers the influences exercised by the ruling elites on civil society and vice versa, thus assessing the effects of the anti-nuclear movement on the state policy and the society. A comprehensive account of the anti-nuclear movement in post-Fukushima Japan, embedded within a broader perspective of the movement's historical development, contemporary political structures, and opportunities, Fukushima and Civil Society will appeal to scholars of sociology and politics with an interest in social movements.

*From 'Japan Problem' to 'China Threat'?* May 14 2021 This book has four main objectives: to bring the thus far almost entirely neglected historical case of 'the rise of Japan' into the literature on power shifts in general and 'the rise of China' in particular; to propose a discourse-based conceptualization of identity for the study of economic policy that engages theoretical and methodological debates on how to overcome the dichotomy between 'ideational' (identity) and 'material' (economic) factors; to address the tendency to focus on the 'radical Other' in poststructuralist IR scholarship, by highlighting how heterogeneity disturbs exclusive and binary articulations of identity and difference; and to propose a method for putting political discourse theory (PDT) into practice in empirical research by drawing on rhetorical political analysis (RPA). US congressional debates on economic policy on Japan and China in 1985–2008 are analysed as examples of official US elite public discourse. The book shows that the 'new era' in US-Chinese relations that scholars and policymakers have been announcing since the beginning of the Trump presidency was long in the making, as it rests on longstanding discourses on the USA's main economic competitor.

*Berichte zur Lebensmittelsicherheit 2014* Jan 22 2022 Das Monitoring ist ein gemeinsam von Bund und Ländern durchgeführtes Untersuchungsprogramm, das die amtliche Überwachung der Bundesländer ergänzt. Dadurch können mögliche gesundheitliche Risiken für die Verbraucher frühzeitig erkannt und durch gezielte Maßnahmen abgestellt werden. Neben Lebensmitteln sind auch kosmetische Mittel und Bedarfsgegenstände Gegenstand des Monitorings. Das Monitoring von Lebensmitteln wird dabei zweigeteilt durchgeführt: Zum einen

werden jährlich zahlreiche Lebensmittel eines definierten Warenkorbtes untersucht, zum anderen werden dazu ergänzend aktuelle stoff- bzw. lebensmittelbezogene Fragestellungen in Form von Projekten bearbeitet.

*The Great Betrayal* Jun 22 2019 The twentieth century saw dramatic changes in the once Kurd-dominated Kirkuk region of Iraq. Despite having repeatedly relied on the Kurdish population of Iraq for military support, on three occasions the United States have abandoned their supposed allies in Kirkuk. The Great Betrayal provides a political and diplomatic history of the Kirkuk region and its international relations from the 1920s to the present day. Based on first-hand interviews and previously unseen sources, it provides an accessible account of a region at the very heart of America's foreign policy priorities in the Middle East. In September 2017, Iraqi Kurdistan held an independence referendum, intended to be a starting point on negotiations with the Iraqi Government in Baghdad on the terms of a friendly divorce. Though the US, Turkey, and Iran opposed it, the referendum passed with 93% of the vote. Rather than negotiate, Iraq's Prime Minister Heider al-Abadi issued an ultimatum and then attacked the region. Iraq's Kurdish population have been abandoned, once again, by their supposed allies in the US. In this book, David L. Phillips reveals the failings of America's policies towards Kirkuk and the devastating effects of betraying an ally.

**Michael O'Hanrahan** Feb 08 2021 From a staunchly Republican family, Michael O'Hanrahan's outwardly quiet and serious demeanour concealed a burning desire to see an independent Ireland. Michael also helped found the workingman's club in Carlow, which he left when they decided to admit a British soldier. After moving to Dublin, he played important roles in both Sinn Fein and the Irish Volunteers. As quartermaster of the Volunteers, he was responsible for the procurement of many of the arms used in the Easter Rising. Michael O'Hanrahan was also a talented journalist and novelist whose development was cut short by his execution in 1916. In this new biography Conor Kostick brings to life a man who helped launch the 1916 Rising.

**Cross-Border Litigation in Europe** Jan 28 2020 This substantial and original book examines how the EU Private International Law (PIL) framework is functioning and considers its impact on the administration of justice in cross-border cases within the EU. It grew out of a major project (ie EUPILLAR: European Union Private International Law: Legal Application in Reality) financially supported by the EU Civil Justice Programme. The research was led by the Centre for Private International Law at the University of Aberdeen and involved partners from the Universities of Freiburg, Antwerp, Wroclaw, Leeds, Milan and Madrid (Complutense). The contributors address the specific features of cross-border disputes in the EU by undertaking a comprehensive analysis of the Court of Justice of the EU (CJEU) and national case law on the Brussels I, Rome I and II, Brussels IIa and Maintenance Regulations. Part I discusses the development of the EU PIL framework. Part II contains the national reports from 26 EU Member States. Parts III (civil and commercial) and IV (family law) contain the CJEU case law analysis and several cross-cutting chapters. Part V briefly sets the agenda for an institutional reform which is necessary to improve the effectiveness of the EU PIL regime. This comprehensive research project book will be of interest to researchers, students, legal practitioners, judges and policy-makers who work, or are interested, in the field of private international law.

**Building Democracy in the Yugoslav Successor States** Feb 20 2022 Building democracy in societies that have known only authoritarian rule for half a century is complicated. Taking the post-Yugoslav region as its case study, this volume shows how success with democratisation depends on various factors, including establishing the rule of law, the consolidation of free media, and society's acceptance of ethnic, religious and sexual minorities. Surveying the seven successor states, the authors argue that Slovenia is in a class by itself as the most successful, with Croatia and Serbia not far behind. The other states - Bosnia-Herzegovina, Macedonia, Montenegro, and Kosovo - are all struggling with problems of corruption, poverty, and unemployment. The authors treat the issue of values as a policy problem in its own right, debating the extent to which values have been transformed by changes in education and the media, how churches and women's organisations have entered into the policy debate, and whether governments have embraced a programme designed to effect changes in values.

*The Interstitial Spaces of Urban Sprawl* Jun 14 2021 This book proposes the idea of interstitial space as a theoretical framework to describe and understand the implications of in-between lands in urban studies and their profound transformative effects in cities and their urban character. The analysis of the interstitial spaces is structured into four themes: the conceptual grounds of interstitial spaces; the nature of interstices; the geographical scale of interstices; and the relationality of interstices. The empirical section of the book introduces seven cases that illustrate the varied nature of interstitiality to finally discuss its implications in the broader field of urban studies. Reflections upon further lines of enquiry and theories of urbanisation, urban sprawl, and cities are highlighted in the conclusion chapter. This is the ideal text for scholars of urban planning, strategic spatial planning, landscape planning, urban design, architecture, and other cognate disciplines as well as advanced students in these fields.

**Translating Evidence and Interpreting Testimony at a War Crimes Tribunal** Sep 25 2019 How can defendants be tried if they cannot understand the charges being raised against them? Can a witness testify if the judges and attorneys cannot understand what the witness is saying? Can a judge decide whether to convict or acquit if she or he cannot read the documentary evidence? The very viability of international criminal prosecution and adjudication hinges on the massive amounts of translation and interpreting that are required in order to run these lengthy, complex trials, and the procedures for handling the demands facing language services. This book explores the dynamic courtroom interactions in the International Criminal Tribunal for the Former Yugoslavia in which witnesses testify through an interpreter about translations, attorneys argue through an interpreter about translations and the interpreting, and judges adjudicate on the interpreted testimony and translated evidence.

*Producing Women* Jul 04 2020 Producing Women examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women's production cultures online, and the ways that individuals can critically study and engage with these practices.

*VAT Neutrality* Jun 26 2022 Most major economies use a value added tax (VAT) which is a derivation of the French 1954 *taxe sur la valeur ajoutée*. The initial imposition of VAT in France and its spread around the world have been driven by economic reasons. This book focuses on one of these economic triggers: the neutrality of VAT as regards the functioning of the economy. It demonstrates that the reason VAT was chosen in France and why thereafter it spread around the world was because it offered the possibility to collect governmental revenue while allowing the economic forces of the market to interplay without being adversely affected. The prerequisite conditions for the

existence of VAT neutrality are therefore identified herein along with an overview of the VAT mechanism, demonstrating that the concept of neutrality is built into the VAT system in a manner that allows for the preservation of the natural functioning of the market. After the definition of VAT neutrality is set forth, the elements that comprise VAT neutrality are tested against the realities on the ground and the issues that infringe the neutrality of VAT are identified and analysed. In conclusion, remedies for these issues are being sought by a review of the causes of infringement of VAT neutrality in the perspective of selected proposals for modified VAT systems. These proposals include redesignating the place where VAT is levied and improving VAT collection. Ultimately, the proposed solution has recourse to the roots of VAT together with the most advanced technological tools available to give back to VAT the power to levy revenue while letting the economic forces of the market interplay without instigating any adverse influence.

*The Impact of eConveyancing on Title Registration* Mar 24 2022 This work is an assessment of how to manage risk in property transactions in the context of the move from paper-based to electronic conveyancing (eConveyancing). In particular the focus is on risks that impact on title registration, and the security, protection or lack thereof that this registration offers to land owners, third parties and property claimants. The impact is the extent to which a change in the transactional process may unintentionally affect risk (being the consequence of change and the likelihood of that consequence having a negative effect). The risks are identified, analysed and evaluated against the backdrop of title registration and the development of eConveyancing through a comparative analysis of the systems in Ireland and Ontario, while also referencing other developing electronic systems around the globe.

**The Syrian Jihad** Apr 12 2021 The eruption of the anti-Assad revolution in Syria has had many unintended consequences, among which is the opportunity it offered Sunni jihadists to establish a foothold in the heart of the Middle East. That Syria's ongoing civil war is so brutal and protracted has only compounded the situation, as have developments in Iraq and Lebanon. Ranging across the battlefields and international borders have been dozens of jihadi Islamist fighting groups, of which some coalesced into significant factions such as Jabhat al Nusra and the Islamic State. This book assesses and explains the emergence since 2011 of Sunni jihadist organizations in Syria's fledgling insurgency, charts their evolution and situates them within the global Islamist project. Unprecedented numbers of foreign fighters have joined such groups, who will almost certainly continue to host them. Thus, external factors in their emergence are scrutinized, including the strategic and tactical lessons learned from other jihadist conflict zones and the complex interplay between Al-Qaeda and the Islamic State and how it has influenced the jihadist sphere in Syria. Tensions between and conflict within such groups also feature in this indispensable volume.

*The Alawis of Syria* Mar 31 2020 Throughout the turbulent history of the Levant the 'Alawis - a secretive, resilient and ancient Muslim sect - have aroused suspicion and animosity, including accusations of religious heresy. More recently they have been tarred with the brush of political separatism and complicity in the excesses of the Assad regime, claims that have gained greater traction since the onset of the Syrian uprising and subsequent devastating civil war. The contributors to this book provide a complex and nuanced reading of Syria's 'Alawi communities - from loyalist gangs (Shabiha) to outspoken critics of the regime. Drawing upon wide-ranging research that examines the historic, political and social dynamics of the 'Alawi and the Syrian state, the current tensions are scrutinised and fresh insights offered. Among the themes addressed are religious practice, social identities, and relations to the Ba'ath party, the Syrian state and the military apparatus. The analysis also extends to Lebanon with a focus on the embattled 'Alawi community of Jabal Mohsen in Tripoli and state relations with Hizballah amid the current crisis.

*Orthodox Christianity and the Politics of Transition* Apr 24 2022 This book discusses in detail how Orthodox Christianity was involved in and influenced political transition in Ukraine, Serbia and Georgia after the collapse of communism. Based on original research, including extensive interviews with clergy and parishioners as well as historical, legal and policy analysis, the book argues that the nature of the involvement of churches in post-communist politics depended on whether the interests of the church (for example, in education, the legal system or economic activity) were accommodated or threatened: if accommodated, churches confined themselves to the sacred domain; if threatened they engaged in daily politics. If churches competed with each other for organizational interests, they evoked the support of nationalism while remaining within the religious domain.
